SQ-License

SQ-License for use of SQ's offerings. SQ refers to StringQuants. SQ-License is for carefree adoption of all Data Driven Tech (DDT) based Offerings in which SQ specializes in.

All offerings put up by SQ inherently carry complete ownership rights by SQ whether there is a mention or not.

Clauses specific to an offering will be provided in the offering documentation (OD). In case of no OD, this document applies in whole.

Guiding principles :

G1 - There's Free Water, There's No Free Lunch.
G2 – Make it work for you.

Usage guidelines :

U1 - If you have seen our offerings or they have been passed-on to you, you are a user. Promotions are not offerings.
U2 - We encourage individual usage. Make it work for you. You are however permitted to pass-on the path to the offering, not the offering itself. An example is, you may pass on the url to a research paper, not the downloaded pdf itself.
U3 - Any form of versioning out from our offerings (part or whole) requires permission. This also applies to internal usage. Under no situation should you completely eliminate a reference to SQ.

V1 - Violations will be dealt with aptly by SQ or its representatives.
